

Why You Should Be Sending Your Child to ET Australia Secondary College

Your child's education is a vital investment in their future.
With 97% of our 2017 graduates¹ engaging in further studies or a career, you can be confident ET Australia Secondary College will equip your child with the skills to be successful in ongoing studies and employment.

#1 A Safe and Supportive Learning Environment

With a no bullying policy enforced by teachers, a student learning support network, literacy and numeracy action plans for each student and individual student pathway plans ensuring each student who graduates is professionally guided towards further study or a career in the workforce, your child will not slip through the cracks at ET Australia Secondary College.

#2 A Board of Studies Approved Curriculum

With an academic focus on literacy, numeracy and work ethic, students enjoy learning the fundamentals of Mathematics, English and Science taught alongside the subjects of French, Mandatory Technology, Creative and Performing Arts, PDHPE and Human Society and its Environment. Each student has access to text books, work books and a College Apple iPad for each student in class to support their learning requirements.

#3 Highly Qualified Teaching and Support Staff

Our highly experienced and well regarded teaching team have worked in a number of different educational settings all over the world. Our teachers deliver quality and specialised teaching across all key learning areas. Together with teacher assistants in every class providing extra student support, our team draw out the best academic results possible for your child.

#4 Students are Treated as Individuals

We empower students with a balance of freedom and responsibility. The school is more like a contemporary workplace – everyone, teachers and students alike, are known to each other on a first name basis, students don't wear school uniforms, there is no homework, our students are young adults and we work harmoniously with them focusing on teaching and learning and positive school activities.

#5 Our Learning Support Network

Provides our students with one on one tailored learning opportunities delivered alongside classroom teaching with a dedicated learning intervention teacher. Our students can also engage in free after school tutoring with their teacher.

#6 Access to School Scholarships

ET Australia Secondary College awards a number of scholarships to school students attending the College. Scholarships are awarded to students due to financial hardship and can cover up to half of a student's annual school fees. Scholarships are funded by generous Central Coast businesses and citizens supporting continued education in our community. Scholarship applications are a relatively simple process, and the majority of scholarship applications are successful.

#7 One School Fee Covers Everything

The school fees at ET Australia Secondary College are all inclusive - textbooks, workbooks, stationery, school locker an Apple iPad per student in class, excursions, sporting fees, on-site youth support services and after school tutoring - all included. The school fee is packed full of added value reducing the stress on your hip pocket³.

#8 Preparation For The Real World

ET Australia Secondary College is focused on equipping students with the skills to be successful in school and after school. Many of our students go on to complete their HSC, while others choose to enrol in adult training courses and/or gain employment.
