

HLTHPS007 Administer and Monitor Medications

Professional development for existing workers looking to advance their skillset.

Are you looking to expand your skill set in a growing industry?

If you're already working in aged care or support services, now is the perfect time to take the next step in your professional development. Local employers are now seeking staff with higher-level medication skills, and HLTHPS007 Administer and Monitor Medications is quickly becoming the industry standard.

HLTHPS007 Administer and Monitor Medications

Gain the confidence and nationally recognised skills to administer medications safely. This fee-for-service unit is essential for professional growth in aged care, disability, and community health.

You will learn how to:

- Follow medication orders and instructions
- Apply the rights of medication administration
- Accurately calculate dosages
- Identify and respond to adverse reactions
- Support clients with professionalism and care

Assessment includes practical workplace experience across 10 clients, ensuring real-world competency.

Students will be awarded a nationally recognised Statement of Attainment on completion of this unit.

Who Should Enrol?

This unit is only suitable for people currently working in the industry who have access to administering medications in their workplace, as real-world assessment is required.

- Aged care and disability support workers wanting to expand their role
- Workers needing medication competency for workplace requirements
- Certificate III in Individual Support learners
- Anyone wanting to stay competitive and capable in the sector

Why Choose ET Australia

- Practical, workplace-focused assessment
- Local training delivery
- Meet current employer and industry expectations
- Supportive and experienced trainers
